San Bruno, CA | isipf908@gmail.com | (650) 315-0856

PROFILE

Disciplined Software Engineer with hands-on mastery in Python, Django, REST APIs, and Docker containerization. Combines systematic diagnostic problem-solving developed across five years of mechanical trade troubleshooting with full-stack software development. Passionate about building robust backend architectures, scalable database schemas, and clean user-facing tools.

EXPERIENCE

2026 | HYPERIONDEV & UNIVERSITY OF SAN FRANCISCO

Software Engineering Graduate

- Engineered and deployed full-stack web applications using Python, Django, HTML5/CSS3, and MySQL, maintaining a 99% cumulative program average.
- Designed relational database schemas, configured ORM queries, and integrated RESTful APIs for role-based web platforms.
- Containerized multi-service applications using Docker and enforced version control workflows using Git and GitHub.

2021 - 2026 | ARIEL'S PLUMBING

Apprentice / Plumber Technician

- Diagnosed and resolved complex physical and fluid system failures across residential and commercial sites under tight time constraints.
- Interpreted technical blueprints and building schematics to ensure strict municipal code compliance and precision installations.
- Communicated complex diagnostic assessments clearly to clients, building trust and maintaining high service quality.

Projects

News Portal Platform

- Full-stack Django news application with role-based access, REST APIs, and multi-stage Docker builds.

Shelf Tracker Database

- Built a Python/SQLite book inventory app with CRUD operations, parameterized SQL queries, and author joins.

Task Manager App

- Built a Python command-line task manager with user login, admin controls, and text-file storage.

VOLUNTEER EXPERIENCE

2018 - 2022 | PILIPINX AMERICAN COLLEGIATE ENDEAVOR (PACE)

San Francisco State University

Member, PCN Performer & Internship Participant

- Collaborated with fellow students to prepare and perform in Pilipinx Cultural Night (PCN), a student-led production celebrating Pilipinx culture and community.
- Completed a nine-week internship program focused on Pilipino/a history, cultural identity, community engagement, and personal development.

EDUCATION

University of San Francisco & HyperionDev

2026 | Online Credential: Software Engineering

Capuchino High School

2014 - 2018 | High School Diploma

TECHNICAL SKILLS

- Python, SQL, HTML5, CSS3
- Django & Django REST Framework
- Docker containerization
- MySQL & SQLite database design
- Git & GitHub version control
- RESTful API integration
- Object-Oriented Programming (OOP)

SOFT SKILLS

- Root-cause diagnostic troubleshooting
- Clear technical communication
- High-pressure problem resolution
- Team collaboration & active listening
